

Hackability Assessment

Think like a hacker. Defend like a strategist.

Our Hackability Assessment goes beyond technical misconfigurations identified through penetration testing by combining cutting-edge AI-driven analysis with seasoned human hacker intuition, revealing the attack vectors that currently threaten your business

See Through a Hacker's Eyes

Understand real-world attack paths.

Full-Spectrum Intel

From social media to the dark web, and beyond - no stone is left unturned.

Global Cyber Experts

Threats reviewed & validated by top analysts worldwide.

Actionable Insights

Prioritized by likelihood & business impact.

Fast, Affordable, Secure

Just **\$5999** with no sensitive data required.

Assessment Outcomes

External Exposure Snapshot

- AI scans + human validation to find exposed assets, shadow IT, and internet-facing risks.

Social & OSINT Profiling

- Map employee and brand exposure from digital communities, forums, & known breaches.

Dark Web Intel

- Identify your company's data on hacker forums, breach dumps, & underground markets.

Real-World Exploit Paths

- Simulate what an attacker could really do with what's out there today.

Hackability Assessment

Service Components

Open-Source Intelligence Review (OSINT)

Collects intelligence from social media, forums, & surface web sources to identify exposures & employee risks.

Dark Web Reconnaissance

Actively scans dark web marketplaces and forums for leaked credentials, company data, & brand mentions.

SaaS Exposure Audit

Evaluates cloud and SaaS platforms for misconfigurations, weak controls, & shadow IT usage.*

Reactive

Employee Threat Profiling

Identifies individuals most susceptible to phishing, social engineering, or credential compromise.

Exploit Likelihood Scoring

Rates vulnerabilities by technical severity & probability of exploitation, ensuring focus on the highest risks.

Threat Intelligence Alignment

Maps discovered exposures to current CVEs, malware campaigns, & attack techniques used by hacktivist groups.

All-Encompassing

AI + Human Analysis

Proprietary blend of automated algorithms and global expert review delivers validated, actionable intelligence.

Prioritized Risk Roadmap

Final report ranks threats by impact and provides a clear mitigation path for leadership & IT/security teams.

Executive & Technical Deliverables

Includes a leadership summary plus a detailed annex for security teams to execute remediation.
